DIRECTIONS FOR USE: READ ALL DIRECTIONS AND NOTICE. In the treatment of new varieties or highly inbred lines, a test area is suggested. DO NOT use SIGNATURE COC in sprays applied during periods of extreme high or low temperatures or humid conditions. SIGNATURE COC may be applied by ground, aerial or CDA equipment. Some pesticides have stated adjuvant use rates. In all cases the pesticide manufacturer's label should be consulted regarding specific adjuvant use recommendations and that rate followed. Do not add adjuvant at a level that would exceed 5% of the finished spray volume.

GENERAL USE RATE: 1 to 8 pints per acre. Follow label of pesticide being used.

MIXING: Fill spray tank 1/2 full of water, add the desired amount of herbicide and continue filling. Add correct amount of SIGNATURE COC last and continue agitation.

Environmental Hazards: Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when cleaning equipment or disposing of equipment washwaters.

STORAGE AND DISPOSAL

STORAGE: Store in original container only, protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Do not reuse container. Use appropriate containment to avoid environmental contamination. If stored below 20°F (-6°C) for an extended period, product may become cloudy and thicken. Raise temperature above 32°F (0°C) and product will return to clear, fluid state.

DISPOSAL: Do not contaminate water, food or feed by storage or disposal. Dispose of contents/container on-site or at an approved waste disposal facility. Triple rinse (or equivalent) adding rinse water to spray tank. Offer container for recycling or dispose of container in sanitary landfill, or by other procedures approved by appropriate authorities. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit the ACRC web page at www.acrecycle.org.
